

Data Update

02/19/2026 9:43 am EST

This is the place to update data from an Excel Spreadsheet.

Use this tool to make large updates to brands within Mecka.

The screenshot shows a web application interface for 'Data Import & Export'. The top navigation bar includes 'Home', 'Catalog', 'Channels', 'Sales', 'Cart', and user information 'Billy Bob's Parts' and 'Billy Bob'. The main content area is titled 'Data Import & Export' and has a sub-header 'Data Update' with tabs for 'Text / CSV', 'Import to PIES', 'Data Update', and 'eBay'. The interface is divided into two main sections: 'Update Data From an Excel Spreadsheet' and 'Spreadsheet Preview Grid'. The left section contains five steps: 1. Select a brand (dropdown: Billy Bob's Parts), 2. Upload an Excel Spreadsheet (button: Select), 3. Set Part Number and Data Row Start (input: 2, dropdown: Part Number), 4. Set Inventory Options and Behavior (dropdown: Head Office, radio buttons: Replace, Add, checkbox: Zero Missing PN's), and 5. Set Price Sheets to Update (list of price sheets with dropdown arrows). The right section, 'Spreadsheet Preview Grid', shows a grid of 20 rows and 10 columns, currently empty.
